

Exder update May 2026

Exder was updated as of May 16 (update window 16:00-00:00 pm. CET).

All messages through Exder during the update were queued and processed once update was completed.

You do not need to do anything, your Exder service is automatically updated to the newest version.

The update addresses the new GDSN article information version 3.1.35.

If you have any questions, you are as always welcome to contact our support.

You are also welcome to visit our status operational page

[Tungsten Automation EMEA Status](#) and monitor the status for our various products.

Best Regards,

Tungsten Automation Exder team
